

Test Project

Floristry

Submitted by Nina Stanley NZ and Johanna Kourusuo FI, Independent Test Project Designers

Introduction

It is a privilege to be tasked with writing this Test Project for Floristry WorldSkills Kazan 2019.

From some online studies about Russia and Kazan one thing was very clear that there are many CONTRASTS in this amazing country, especially a mix of tradition, history and old mixed with modern, contemporary and new and the list goes on.

These Test Projects are based around these contrasts and are inspired by the wonderful cit/country we are visiting.

The Test Project is written based on the Floristry (skill 28) Technical Description and WSSS.

It is important that Botanical material must always be dominant in every Test Project!

The projects are designed to challenge a young florist, they are varied and require many different techniques!

Sustainability is very important, so the materials supplied have been very carefully considered in order to reduce waste while also being interesting and sufficient!

Where Materials are “free of choice” this means free of choice from the list of materials provided to you and your tools, this does not include and other materials or furniture.

For surprise projects you may be asked to use specific items, materials please follow instructions carefully.

Please Enjoy every minute of this incredible opportunity to represent your country in our beautiful skill Floristry.
